

PARENT AND FAMILY LIFE EDUCATION

Societal changes have greatly influenced the home and have given rise to serious problems in the lives of children and youth. These changes necessitate added concern for PTAs to promote continuing education of parents in order that they may adjust more effectively to evolving family patterns.

Therefore, the Missouri Congress of Parents and Teachers urges emphasis on parent and family life education, seeks increased cooperation with the appropriate agencies, and suggests that all its member units give priority to parenting programs.

Adopted 1991
