

## **PASSENGER RESTRAINTS PICKUP TRUCKS AND VANS**

The Missouri Congress of Parents and Teachers places a high priority on the physical well being and safety of children and youth. The absence of laws requiring passenger restraints in all passenger vehicles including pickup trucks and vans continues to be a factor in traffic injuries in the state of Missouri.

Approved passenger restraints systems should be required and used in passenger vehicles including pickup trucks and vans.

The Missouri Congress of Parents and Teachers encourages its members, units and councils to work for the passage of additional laws mandating the use of passenger restraints in pickup trucks and vans.
